AULTA

USER MANUAL

All AULTA watches are made of 100% hypoallergenic 316L stainless steel.

BATTERY LIFE

The battery of your AULTA watch should last approximately two years. Please be sure to replace it as soon as it expires to prevent any malfunction or damage to the piece.

LEATHER STRAPS

Our leather straps are made with the finest materials. Keep yours in pristine condition by shielding it from direct sunlight for prolonged periods, which can cause fading. Also, **do not** submerge leather straps in water.

ABOUT THE SCREW-DOWN CROWN

All AULTA watch models feature a screw-down crown; this component helps prevent moisture infiltration. Always be certain that your crown is completely screwed down before entering any environment or before undertaking any activities where moisture is present. Never unscrew your crown while in any environment where moisture is present.

OPERATING THE SCREW-DOWN CROWN

In order to pull the crown out to the first or second locking position, it must first be unscrewed. To open the crown, simply turn the crown counter-clockwise 4 to 5 turns. To close the crown and screw it down, push it in while turning clockwise; lightly finger-tighten the crown. Do not over-tighten the crown. The threading of your AULTA screw-down crown aids in effective moisture resistance. By over-tightening the crown the seals, gaskets and related materials can be damaged, resulting in reduced moisture resistance.

CROWN POSITIONS

The AULTA screw-down crown has four positions:

One: Screwed down (closed): The crown of your watch is ready to wear and is moisture resistant.

Two: Unscrewed (open): The crown of your watch is unscrewed and not moisture resistant.

Three: Unscrewed, with crown pulled out to the first notch (open): to set the hour hand. The crown of your watch is unscrewed and not moisture resistant.

Four: Unscrewed, with crown pulled out to the second notch (open): to set the date. The crown of your watch is unscrewed and not moisture resistant.

WATER RESISTANCE

- Make sure the crown is screwed down completely before using your watch in or near water.
- Steam may compromise the watch's water resistance, so it is best to keep it away from hot tubs, saunas or hot showers.
- Water resistance may decrease over time and with wear and tear, so please use caution.
- All AULTA watches are rated 10 ATM.

MARKING	RAIN AND HANDWASHING	SWIMMING	SNORKELING	SCUBA
—	NO	NO	NO	NO
3 ATM	YES	NO	NO	NO
5 ATM	YES	YES	NO	NO
10 ATM	YES	YES	YES	NO

THE SEAWARD OPERATING INSTRUCTIONS
